

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant: Isaac Lagnado

Confirmation No. 6812

Application Serial No.: 10/829,067

Group Art Unit: 2683

Filed: April 21, 2004

Examiner: Brandon J. Miller

Title: System and Method for Accessing
A Wireless Network

Atty Docket No. 200313247-1

**DECLARATION OF ISAAC LAGNADO
UNDER 37 C.F.R. §1.131****Mail Stop: Amendment**
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

I, Isaac Lagnado, the inventor of the above-referenced patent application, enclose hereto as Exhibit A, a true copy of an invention disclosure form, with dates and portions redacted as noted, which was received by the Legal-Intellectual Property department of Hewlett-Packard Company on a date prior to January 7, 2004, in the ordinary course of business as part of Hewlett-Packard Company's invention disclosure program. This invention disclosure form indicates a conception of my invention, which is the subject of the above-referenced patent application, on a date(s) prior to January 7, 2004. In accordance with Hewlett-Packard Company's invention disclosure program at that time, upon receipt of an invention disclosure document from an inventor, the invention disclosure document is dated with the date of receipt by the Legal Intellectual Property department of Hewlett-Packard Company and assigned a docket number.

My invention that is the subject matter of the above-referenced application was conceived and reduced to practice while working in the United States for Hewlett-Packard Company. The invention disclosure form attached hereto as Exhibit A includes an explanation of the subject matter of the claims of the present application. Specifically, at least page 5 of the invention disclosure form includes an explanation of the subject matter of the claims of the present application.

I actively worked with counsel preparing my patent application from a time prior to January 7, 2004 until the date of filing of the above-referenced patent application.

I also enclose hereto as Exhibit B, a true copy of some of my various correspondences with counsel, with portions redacted as noted, pertaining to the preparation of the above-referenced patent application on dates as indicated, which demonstrate, alone and/or in

combination with the invention disclosure form, diligence in the completion of the invention which is the subject of the present Application from a time prior to January 7, 2004, continuously up to the date of filing of the above-referenced patent application.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 101 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

ATTORNEY: AWW

All IPG inventors and other inventors who have access to Disclose should submit their disclosures through that application. The url is

< <https://wkrpweb1.cv.hp.com/dbi?application=disclose> >. Invention Disclosures submitted here by inventors who have access to Disclose will not be processed at all.

Instructions: The information contained in this document is HP CONFIDENTIAL and may not be disclosed to others without prior authorization. Submit this disclosure to the HP Legal Department as soon as possible. No patent protection is possible until a patent application is authorized, prepared, and submitted to the Government.

Red text indicates a required field.

Descriptive Title of Invention: Wireless LAN Quiet Idle Mode				
Name of Project:				
Product Name or Number:				
Submitter Location (City): Houston Texas				
Was a description of the invention published, or are you planning to publish? If so, the date(s) and publication(s): REDACTED				
Was a product or prototype including the invention (i) announced, offered for sale, or sold to any third party (for example, customer, supplier, contract manufacturer), or (ii) sold to HP by, for example, a supplier or contract manufacturer, or (iii) is such activity proposed? If so, when and to whom?: REDACTED				
Was the invention disclosed to anyone outside of HP, or will such disclosure occur? If so, the date(s) and name(s): REDACTED				
If any of the above situations will occur within 3 months, call your IP Attorney or the Legal Department now at 1-898-4919 or 970-898-4919				
Was the invention described in a lab book or other record? If so, please identify (lab book #, etc.) REDACTED REDACTED				
Was the invention built or tested? If so, the date: REDACTED				
Was this invention made under a government contract? If so, the agency and contract number: REDACTED				
Description of Invention: Please describe your invention in detail using the following outline. A. Prior solutions and their disadvantages (attach copies of any pertinent product literature, technical articles, patents, etc.). B. Problems solved by the invention. C. Advantages of the invention over what has been done before. D. Description of the construction and operation of the invention. (include appropriate schematic, block & timing diagrams, drawings, samples, graphs, flowcharts, computer listings, etc.). Electronic Attachment				
List any pertinent patents material to the invention.				
List any articles or references or devices pertinent to the invention.				
Identify Inventor(s): Pursuant to my (our) employment agreement, I (we) submit this disclosure on this date: REDACTED

Form 3.1 ldf.doc, rev. REDACTED

Write in Dark Ink on Front Side Only, Please

Description of Invention: Please preserve all records of the invention and attach additional pages for the following. Each additional page should be signed and dated by the inventor(s) and witness(es).
A. Description of the construction and operation of the invention (include appropriate schematic, block, & timing diagrams; drawings; samples; graphs; flowcharts; computer listings; test results; etc.) WLAN Quiet Mode – Create a WLAN state known as "Quiet Mode". This state will enable the WLAN device to always be in quiet mode during its scanning/not-connected states until it receives a valid wireless network SSID. A "Valid SSID" is defined as an SSID that is currently part of its requested SSID list that has been configured on the system. Quiet Mode is defined as not transmitting any packets, until it is deemed allowed to do so. This will add another level of security so that no one knows there are wireless devices active or that the wireless devices are turned off. This could be done by the following modification to existing WLAN driver firmware... <ol style="list-style-type: none">1. Utilize only passive scanning for searching of available AP's.2. Not issue any probe request until a valid SSID is heard.3. If a SSID is encountered with a null string (i.e. a hidden SSID), then the user could be prompted with a dialog that says would like to connect to the unknown SSID.4. Ad-hoc connections would only be made with valid SSID's.5. Ad-hoc connection could be started through a UI request (start ad-hoc connection), for connection two ad-hoc clients that are both in Quiet mode.
B. Advantages of the invention over what has been done before. The current Wireless LAN implementations will continually transmit Probe requests of all SSID that are configured on the devices requested list. This allows you to be heard when you are not connected to an AP. Also when you are not connected to an AP, you are most likely in a location that is insecure, and it is these locations that your information security may most likely be violated (airports, hotels, coffee establishment, home)
C. Problems solved by the invention. This Quiet Mode feature makes the wireless devices invisible, and does not allow the wireless device to be detected by others when the device is not connected to an AP. Basically the WLAN devices will only communicate and respond to AP's that they have been configured to respond to. This will prevent hackers from impersonating an AP and connecting to your system, or connecting to your ad-hoc setting. It is also a security barrier in that if you are connected to your corporate network (via wired LAN) and your WLAN device is sending out SSID information, a hacker could possibly bridge through your wireless device to get directly into the wired LAN you are connected to.

Anand,

Update **REDACTED**

Thanks for your patience, I am still working through the document, trying my best to finish I made some changes that I think will improve the patent. Basically allowed for the selection criteria to be widened, not just using SSID, but using other informational elements in the beacon such as Security Level, network type, Modulation, data rate...so that the decision to join a network can be optionally much more stringent about the requirements. Enforcing not only SSID, but other criteria before allowing device to transmit, a good consequence of this is that hidden SSID's can be interrogated for more suitable matches based on the other criteria (since SSID is hidden).

REDACTED

Give me till lunch time tomorrow and I will send you what I have, and if you like we can discuss in the afternoon. Hopefully I am not delaying any of your schedules based on my review.

Thanks,

Isaac
